

VIRTUAL EDITION

Entre Hack

A hands-on,
online entrepreneurship programme

Learning Objectives

01

This online bootcamp will expose students to the new venture creation cycle, via experiential hands-on activities done digitally.

02

Students will pick up technical skills and soft skills, by experiencing what it means to be a co-founder. Students are expected to demonstrate an entrepreneurial mindset over the course of the programme, as well as pick up startup best practices such as user-centric design, lean methodology, validation and value creation.

03

At the end of the bootcamp, students will deliver an abridged investor pitch deck with an accompanying prototype, centered around a selected theme.
