About Anda Analytics Ltd.

Anda Analytics Ltd was formed to assist with raw commercialisation and spinout of the Bioshield, next generation Smart Mouthguard technology developed by Associate Professor in Engineering Science at University of Oxford, Jeroen Bergmann and his team. The bioshield device, which in addition to protecting the wearer from oral injuries, contains an embedded sensor set that measures physiological parameters and motion to inform better performance management of the wearer.

Outline

The importance of biometric data to solve for identifiable use cases in elite sports, military and firefighting, but the realm of possible for what the broader use of the data could be used for in the future, eg thoroughbred training and personalising avatars in the metaverse. I'd also like to discuss the challenge of bridging the gap to educate a customer base of the benefits of Bioshields to improving their health and wellness.

Apply for participation

Application deadline

24 Oct, 2022

Monday 10:00
